

The tasks of the 2nd week of the commercial engineering track.

Needs:

I would certainly such as the robot to provide me with info concerning the company as well as one of the most essential success and also several of its industries.

Layout:

The robotic contains a incorporated and also full structure starting from the head to a tv displaying the attributes of the robotic "eyes as well as mouth"

The body will certainly have a mid-sized display presenting the details. 2 arms and also 2 guys are outfitted with disbands from both sides to facilitate activity.

Test operations on Android:

The examination was performed on the first parts of the robot and Hai legs and also

the emphasis got on the Suspension system and the flexibility of the joints and their ability to bump.

I appreciate stating that nearly the first experiments of the fancy feet succeeded, yet the examinations are still early
